

## **Advance @ AstraZeneca Role Model Event for Men and Women "Family & Career – Long Term Partnership!"**

What do modern families look like and how do careers fit into the picture? Many women still don't think they have the opportunity or have the support system to advance their careers while maintaining a fulfilling home life.

What's more, over 60% of millennial women believe that having children will make it harder for them to advance their career. How difficult is it to balance family and career? Is this a concern only for women? What do men want and how does having a family affect their lives?

Join us for this event to learn how various modern families have found their balance in having both a family & a career!
